

Opportunity

Job Title:	Econometrician
Company Description:	Energy Forecasting
Location:	Central London
Stay duration:	Permanent
Start Date:	ASAP

Job Description:

As an Econometrician:

- You will learn basic and intermediate methods of electric load and gas forecasting model production, recalibration and maintenance. This process is computer and statistics intensive, with several automated tools to help with model production. You will learn Unix and Windows command line interfaces for interaction with the software product.
- You will help maintain and develop the different data processing systems (data processing scripts and automated tools, database systems, product delivery systems).
- You will interact with customers by phone and email. You will use your statistical background and analytical skills to describe to them complex results in a concise manner. You will be given the opportunity to meet clients directly at their places of business.
- You will be based at our London office.

Essential requirements:

- Excellent/Fluent English – written & spoken
- Strong academic background in a quantitative discipline: econometrics, mathematics, statistics, physics, engineering
- Intermediate understanding of statistical theory and/or econometrics
- Motivated work ethic with analytical skills and good attention to details
- Strong decision-making ability under pressure and time constraints
- Good PC skills in a Microsoft windows operating environment
- Ability to work as part of a team in a multicultural environment

Desirable attributes:

- R, C#, VBA, Excel
- Familiarity with UNIX computer environment command line interfaces or databases such as MySQL or MS SQLServer
- Advanced knowledge of statistical theory and/or econometrics
- Intermediate knowledge of economics
- Basic understanding of statistical/econometric analysis computer software
- Experience in analysis of and pattern detection in large data sets
- Fluency in another EU language
- Previous experience shall be preferred, especially if energy related

Company activity:

- Our company provides highly accurate load forecasting solutions to the electric and gas industries in the US, Europe, Middle East and Asia/Pacific with the potential for further expansion worldwide
- As a small and highly specialised organisation, we place a great emphasis on retaining and developing our staff

Location:

- Based at our London office
- The London office is a 15-20 minute walk from central London attractions such as Westminster, the South Bank and the West End theatre district

Remuneration details:

- A competitive salary of £23,700 per annum will be provided for the right candidate.
- Pension plan, cycle ownership scheme
- Membership of team commission pool after 12 months
