

Press Release

Partnership with Green SAC

TESLA Inc. (www.teslaforecast.com), worldwide providers of SaaS demand forecasts for energy markets and participants, is pleased to announce our partnership with Green Services and Consulting SAC (www.green-sac.com) in Peru.

Green SAC provides turnkey projects and services for PV Projects, Storage Projects (BESS), Energy Efficiency and Services to Peru that are focused on decarbonization, technology innovation, and safety.

Peru is undergoing a significant transition in its electric system. In addition to the widespread development of wind and solar generation, programs are being implemented to encourage industrial users to install backup generation/storage on site, and curtail use during peak periods. Green SAC provides solutions which allow such users to benefit from these programs. TESLA is providing a load forecast to Green's proprietary software that helps identify peak hours to users. This will provide a complete system for users to monitor market behavior, adjust consumption of MWs, and avoid penalties from the market operator.

We expect this partnership to provide Green SAC with an advantage to users in the Peruvian market. By accurately forecasting demand, especially daily peaks, Green SAC will deliver a competitive and integral solution to their clients.

About TESLA, Inc.

We provide a host of tools to enable players in the energy industry to craft the most comprehensive understanding of their future energy needs. The unique TESLA Model produces the most accurate energy demand forecasts in the industry, and our staff of analysts and engineers ensure the reliable delivery of those forecasts where and when you need them. For more information, please contact latam@teslaforecast.com.

About Green SAC

Green SAC is made up of professionals with extensive experience in the industry, energy and mining sectors. Our goal is to help our customers reduce their carbon footprint, improving the quality of life and revaluing their final products with the use of renewable energy. We offer high quality innovative solutions with a high safety standard. For more information, please contact sales@green-sac.com.
